

CHRISPOP DESIGNS & INNOVATIONS

Thank you for considering us for your project. This guide provides an overview of all of our services helping you choose the right solution to create.

Service Line 1 — 3D Printing & Rapid Prototyping

Description	FDM and resin-based 3D printing for prototypes, consumer goods, architectural models, medical aids, spare parts, and custom objects across all sectors.
Technology	FDM (PLA, ABS, PETG filaments) Resin SLA/MSLA Multi-colour printing capability
Target Clients	Construction firms, healthcare providers, engineers, students, NGOs, and entrepreneurs
Pricing	\$0.80–\$2.50 per gram depending on material + setup fee; minimum order \$15; express 12-hr service at 40% premium
Lead Time	Standard: 24–72 hours Express: 12 hours Bulk production runs: negotiated

Service Line 2 — CNC Routing & Precision Machining

Description	Computer Numerical Control routing of wood, acrylic, foam, aluminium, and composite panels for furniture, signage, interior fittings, and industrial components.
Technology	4-axis CNC router Spindle speed up to 24,000 RPM 1,300 x 2,500 mm work area
Target Clients	Interior designers, furniture manufacturers, signage companies, construction contractors

Pricing	Hourly machine time \$25–\$65/hr + material + setup; project-based billing for large contracts
Lead Time	2–5 business days standard; rush service available at premium

Service Line 3 — Laser Cutting & Engraving	
Description	High-precision laser cutting and engraving on acrylic, wood, leather, fabric, and metal for awards, branding materials, packaging, custom gifts, and industrial markings.
Technology	80W CO2 laser cutter/engraver 600 x 900 mm bed Vector and raster cutting modes
Target Clients	Retail brands, event companies, NGOs, hotels, government agencies, educational institutions
Pricing	Per-job pricing based on material, area, and cut complexity; minimum \$12 per job
Lead Time	Same-day to 48 hours depending on complexity and queue

Service Line 4 — Graphic Design & Digital Branding	
Description	End-to-end graphic design: brand identity, product packaging, marketing materials, digital assets, and UI/UX design for Liberian and regional businesses.
Technology	Adobe Creative Suite CorelDRAW Figma Dedicated in-house design team
Target Clients	SMEs, NGOs, political campaigns, hospitality, retail, financial services

Pricing	Logo: \$150–\$500 Full Brand Package: \$500–\$2,000 Monthly retainer: \$300–\$800
Lead Time	3–10 business days depending on scope; rush delivery available

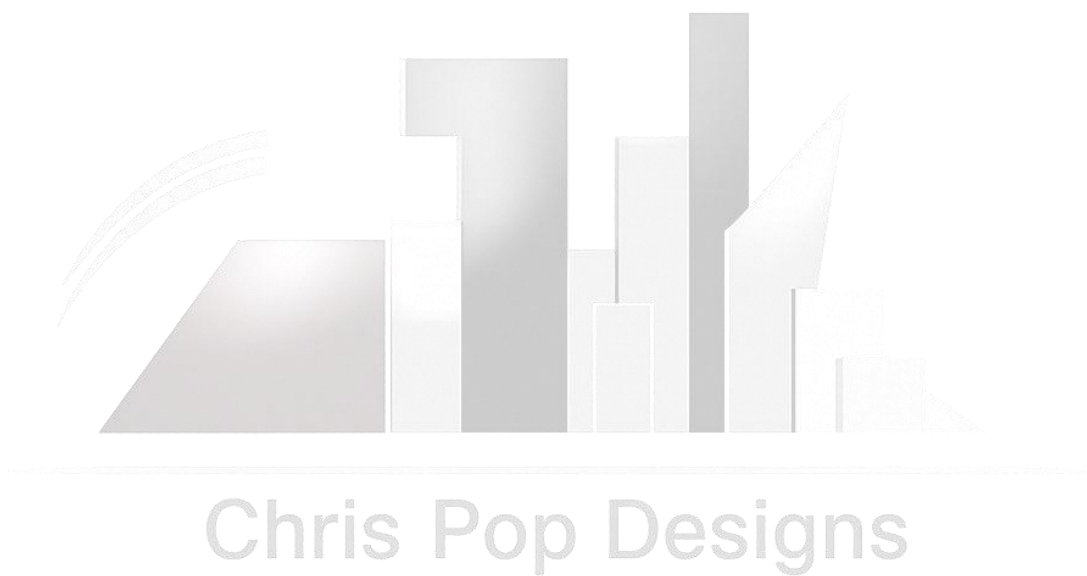

Service Line 5 — Technical Training & CPDI Academy

Description	Paid skills training in 3D design (Fusion 360, Tinkercad), digital fabrication operation, graphic design, and tech entrepreneurship for individuals and institutions.
Formats	2–4 week short courses Weekend bootcamps University partnership programmes NGO-sponsored cohorts
Target Clients	Youth job-seekers, university students, NGO staff, government ministry trainees, corporate teams
Pricing	Individual: \$80–\$250/course Institutional cohort: \$1,500–\$8,000 Donor/NGO-funded: grant-supported
Social Impact	Directly feeds CPDI's internal talent pipeline; creates Liberia's first certified digital fabrication workforce

Service Line 6 — Product Design & OEM Manufacturing

Description	Full-cycle product development: concept → CAD design → prototype → small-batch or full production run. Primary focus on import-substitution consumer and industrial goods.
Products	Furniture hardware, construction components, promotional merchandise, packaging inserts, agricultural tools, spare parts
Target Clients	Local manufacturers, retail chains, export-oriented SMEs, mining companies

Pricing	Design fee \$300–\$2,000 + per-unit production cost; minimum production volumes negotiated per project
IP Policy	Full design ownership transferred to client upon final payment; CPDI retains no rights unless a formal licence arrangement is agreed
